## INTEROFFICE MEMORANDUM

DATE: November 16, 1995  
TO: Ann Sieben, Kaiser -Hill  
FROM: Mark Buddy, Sitewide Actions Group  
SUBJECT: IA IM/IRA Highlights for the Week of November 13, 1995

An internal BCP is being developed to convert hours to subcontractor dollars to cover shipping costs for the industrial area VOC air monitors.

Discussions have been initiated with the D&D group to determine FY 96 monitoring requirements. These will be coordinated with D&D project activities. The latest indication is that buildings 884, and 889 will be scheduled for D&D in FY 96. This plan is being presented to KH for approval. If this holds true, the current monitoring configuration will cover these buildings.

The groundwater well installation has been initiated with the Remediation Services Group.
